## HOSPITAL ON WHEELS

Introducing the most compact HOSPITAL ON WHEELS with Multi Specialty Diagnostics, Hospitals on wheels, or mobile healthcare units, have the potential to revolutionize health services in urban and rural areas by making high-quality medical care accessible, timely, and more efficient. These mobile units are essentially clinics or small hospitals that travel to various parts of the city, providing essential healthcare services to people who may otherwise struggle to access traditional hospitals due to geographic, economic, or logistical barriers. In smart cities, where data and technology are leveraged to improve residents' quality of life, hospitals on wheels bring healthcare right to people's doorsteps, integrating seamlessly with other urban health and wellness initiatives.

## MOBILE CLINIC VAN

we are proud to present Health on Wheels – a mobile healthcare unit designed to deliver essential medical services to underserved and remote communities. Health on Wheels is a fully equipped mobile healthcare unit that brings diagnostic and preventive healthcare directly to the doorstep of communities. This initiative aims to bridge the gap in healthcare accessibility by addressing the challenges of limited infrastructure and geographical constraints.

- **Comprehensive Diagnostic Facilities:**

Equipped with advanced diagnostic tools, including health kiosks, portable lab equipment, and telemedicine integration

- **Self-Sustainable Operations:**

Powered by solar energy and equipped with backup systems, Health on Wheels ensures uninterrupted services regardless of location.

- **Teleconsultation Capabilities:**

Patients can consult with specialists through secure telemedicine platforms, ensuring expert care even in remote locations.

- **Community Outreach:**

Designed for mass healthcare programs, Health on Wheels is ideal for health camps, school outreach programs, disaster relief efforts, and large gatherings such as the Maha Kumbh Mela.

Customer: ICICI (CSR activity)

The Char Dham Yatra is a revered pilgrimage route in the Himalayas of Uttarakhand, India, which attracts millions of devotees every year. The yatra is considered one of the most sacred and challenging treks in the Himalayas, covering a distance of over 270 kilometers. The journey is marked by steep climbs, treacherous terrain, and unpredictable weather conditions, making it a significant health risk for pilgrims.

## UATTARAKHAND GOVERNMENT SIGNS AGREEMENT WITH HEWLETT PACKARD FOR HEALTH ATM'S ON CHARDHAM ROUTE

Dehradun, 25 Mar: In the presence of Chief Minister Pushkar Singh Dhami, Director General, Medical Health and Family Welfare and Director Corporate Affairs and Corporate Social Responsibility (CSR) of Hewlett Packard Enterprise (HPE) signed an agreement for health screening in identified medical units of Garhwal division.

### Objectives:

The objectives of the project were to:

- Provide basic healthcare services to pilgrims undertaking the Char Dham Yatra
- Reduce the risk of health-related issues and accidents during the yatra
- Enhance the overall pilgrimage experience by providing access to healthcare services at strategic points along the route

The installation of health kiosks in PHCs and CHCs along the Char Dham Yatra route is a significant initiative that aims to improve healthcare services for pilgrims undertaking this challenging trek. While there are several challenges associated with this project, the benefits of improved healthcare services, reduced waiting time, and improved patient engagement make it a worthwhile endeavor.

### Chardham Yatra: Uttarakhand Health secretary inspects Health ATMs, reviews medical preparedness

ANI | Updated: Apr 13, 2023 22:44 IST

Srinagar (Uttarakhand) [India], April 13 (ANI): In view of the upcoming Chardham Yatra, Uttarakhand Health Secretary Dr R Rajesh Kumar inspected Health ATMs installed at sub-district hospital Srinagar and base hospital Srikot.

During his inspection, Kumar also gave necessary guidelines to the hospital administration for the smooth functioning of the Health ATMs and asked officials to keep a technical person posted at these ATMs for the convenience of the pilgrims.

### Uttarakhand: 10 Health ATMs installed on Badrinath, Hemkund yatra routes

ANI | Updated: Apr 15, 2023 10:56 IST

Chamoli (Uttarakhand) [India], April 15 (ANI): Aiming to strengthen the health services, the Uttarakhand government has installed 10 health ATMs on the Badrinath and Hemkund Yatra routes, according to an official statement.

State health secretary Dr R Rajesh took stock of the health arrangements while inaugurating health ATMs at Primary Health Centres in Gauchar and Karnprayag on Thursday, the statement said.

# CASE STUDY

सत्यमेव जयते

Health & Family Welfare  
Department  
Government of Gujarat

## Background:

The Government of Gujarat, India, launched a tender process to install health kiosks in primary health centers (PHCs) and community health centers (CHCs) across the state. The objective of the project was to provide basic healthcare services to rural populations, improve healthcare outcomes, and reduce healthcare costs.

## ATMs dishing out any time health checks in lion's abode

Machine In  
PHCs Conducts  
40 Body Tests

Nimesh.Khakhariya  
@timesgroup.com

Rajkot: Want a complete health check-up done? You may not mind driving all the way to a primary healthcare centre (PHC) in Junagadh. Surprised? Read on! In the district, famed for the Asiatic lions in Gir, the PHCs, some of them nestled amid lush forests, can turn the best of health check-

It is equipped with a digital stethoscope that can conduct

One has to simply stand on a special machine that will take your blood sample and conduct as many as 40 vital body profile tests, including those for cancer, HIV, and cardiac diseases.

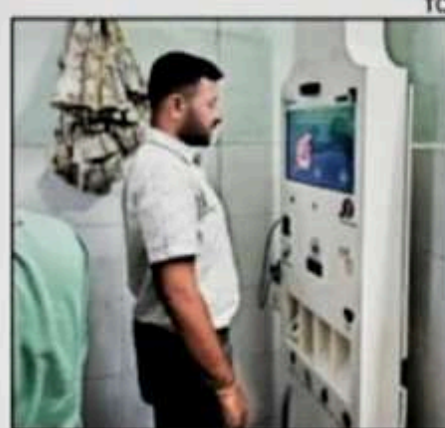

Junagadh district administration has installed these custom-made 'health ATMs' in all its 40 PHCs in nine talukas in the project touted to be the first of its kind in Gujarat. In fact, police who catch people boozing won't have to travel to the Junagadh Civil Hospital as the machine is equipped to conduct an alcohol test.

## Junagadh 1st in state to get health ATMs

► Continued from P1

Mirant Parikh, district development officer (DDO), Junagadh, told TOI, "We had placed the requirement for a customized machine through the government e-marketplace. A private company from Pune which evinced interest and quoted the lowest price was chosen."

Each machine costs Rs 5 lakh and the entire project has been funded from the administration's own funds and the grants of local MLAs. "Ju-

Each machine costs Rs 5 lakh

nagadh is the first district in the state to get customized health ATM and provide it to all the PHCs," said Parikh.

The machine equipped

with a digital stethoscope can conduct ECG for the heart, non-invasive haemoglobin tests, kidney function tests like creatinine, bilirubin, glucose tests, ear-nose-throat evaluation, skin and nail imaging, eye check for astigmatism, colour vision deficiency and dry eyes. It will also enable risk markers of cancers of the lungs and breast, and brain stroke besides AIDS.

Junagadh has around 31% forest cover including hilly terrain of Girnar ranges that nestle remote villages, and 335 km coastline too. "Li-

festyle diseases like diabetes and hypertension are on the rise in the rural areas too. But these remain largely undetected as villagers have to come to the civil hospital in Junagadh. This health ATM will help save on travel time and cost too," Parikh added.

On average, 60-70 people visit a PHC in the district every day, officials said.

Once diagnosed, the medical officer at PHC will send the reports to senior doctors in the civil hospital who will in turn prescribe the treatment through telemedicine.

# CASE STUDY

## Background:

The Government of Maharashtra, India, launched a initiative to provide 7/12 land reports to citizens through a vending kiosk in Vidarbha region. The objective of the project was to provide citizens with easy access to land records, reduce the need for physical visits to government offices, and increase transparency and accountability.

## Requirements:

The project required the installation of vending kiosks in various locations across Vidarbha region. The kiosks were designed to dispense 7/12 land reports to citizens, which would provide information on the ownership and details of the land. The kiosks were equipped with a user-friendly interface and a printer to print the reports.

## Installation Locations:

The vending kiosks were installed in the following locations across Vidarbha region:

District Collectorate Offices  
Tehsil Offices  
Taluka Offices

## Benefits:

The installation of 7/12 land report vending kiosks in Vidarbha region has several benefits, including:

**Easy access to land records:** Citizens can now access their land records easily and quickly, without having to visit government offices.

**Reduced waiting time:** The kiosks reduce the waiting time for citizens, as they can access their reports quickly and efficiently.

**Increased transparency:** The kiosks increase transparency and accountability, as citizens can access their land records online.

**Cost-effective:** The kiosks are cost-effective, as they reduce the need for physical visits to government offices and minimize the risk of errors.

The installation of 7/12 land report vending kiosks in Vidarbha region is a significant initiative that aims to improve access to land records for citizens. While there are several challenges associated with this project, the benefits of easy access to land records, reduced waiting time, increased transparency, and cost-effectiveness make it a worthwhile endeavor.

# CASE STUDY

## Background:

The Pimpri Chinchwad Municipal Corporation (PCMC) in Maharashtra, India, launched an initiative to promote the use of cloth bags and reduce plastic bag usage in the city. To achieve this goal, the corporation installed cloth bag vending machines in various locations across the city.

## Objectives:

The objectives of the project were:

- To promote the use of cloth bags and reduce plastic bag usage in the city.
- To provide an alternative to single-use plastic bags.
- To reduce the environmental impact of plastic bag usage.

## Installation Locations:

The cloth bag vending machines were installed in the following locations across Pimpri Chinchwad:

- Public transport hubs (bus stations, railway stations)
- Markets and shopping areas
- Educational institutions (schools, colleges)
- Public spaces (parks, squares)

The installation of cloth bag vending machines in Pimpri Chinchwad is a significant initiative that aims to promote sustainable practices and reduce plastic bag usage in the city. While there are several challenges associated with this project, the benefits of reduced plastic bag usage, increased cloth bag usage, convenience, and increased awareness make it a worthwhile endeavor.
